

PAVAN DURGAM

Full Stack Java Developer

Hyderabad, Telangana, India | +91 6309700354 | durgampavan2017@gmail.com | [linkedin.com/in/durgampavan](https://www.linkedin.com/in/durgampavan) | github.com/PavanDurgam16

PROFESSIONAL SUMMARY

Full Stack Java Developer with **2+ years of experience** designing and delivering enterprise web applications using Java, Spring Boot, Angular and ReactJS. Proven track record of **modernizing 15+ legacy finance modules to Spring Boot/REST APIs**. Skilled across the full stack from secure REST API design with Spring Security/JWT to responsive ReactJS interfaces and Angular UI and components, with hands-on exposure to Spring Cloud (Basics), Docker, and AWS (EC2, S3, IAM). Experienced working in Agile teams delivering measurable performance, reliability, and productivity gains for enterprise clients across finance and manufacturing domains.

CORE COMPETENCIES

• Java 8+ • Spring Boot • ReactJS • Angular • REST APIs • Microservices • Spring Security (JWT) • Spring Data JPA / Hibernate • Spring Batch
• SQL / PL/SQL • AWS (EC2, S3, IAM) • Docker • Apache Kafka(Basics) • Redux Toolkit • Responsive UI Design

PROFESSIONAL EXPERIENCE

Full Stack Java Developer — Satyam Venture Engineering Services, Hyderabad

Oct 2024 – Present

Client Engagement: ZF Lifetec — VSA Reports

Feb 2026 – Present

- Developed and managed the report-processing pipeline by consolidating file ingestion, Excel/PPT extraction, templating, and export into a single Spring Boot application with a ReactJS front end, **reducing operational processing time from 2 months to just 5 minutes**.
- Building and exposing **REST APIs with Spring Data JPA**, implementing upload, processing, job-status, image-metadata, and streaming download endpoints with server-side pagination, sorting, and filtering for large reports.
- Implementing **Excel image extraction and image-to-measurement mapping**, extracting precise range screenshots from Scopes workbooks and mapping PNG assets to measurement identifiers from XML for accurate templated exports.
- Implemented **comprehensive audit logging across all user actions** including uploads, processing triggers, report downloads, and admin configuration changes, **ensuring full traceability and compliance** for enterprise reporting requirements.
- Delivering upload/status UI and templated export flows in ReactJS so users can upload files, monitor processing, preview reports and download final reports.

Client Engagement: e-Finance

May 2025 – Jan 2026

- Developed 15+ financial modules** covering end-to-end accounting workflows including Credit/Debit Notes, Balance Sheets, Purchase Journals, Invoice Reconciliation, Customer Management, and Tax Configuration using Spring Boot backend with ReactJS frontend, improving maintainability and reducing production defects across core financial workflows.
- Engineered a reusable ReactJS component library using React-Bootstrap and R-Suite for high-volume financial data entry and reporting screens, **cutting data entry time by 30%** for end users.
- Built and exposed REST APIs with Spring Data JPA to support **Excel/PDF export, server-side pagination, sorting, and filtering** across large financial datasets, improving usability for finance operations teams.
- Optimized backend performance by re-engineering SQL/PL-SQL into JPA/Hibernate and tuning queries, **reducing average API response time by 24%** on high-traffic endpoints.
- Implemented **centralized exception handling** and comprehensive logging using Spring AOP and SLF4J, enabling quick error detection and faster issue resolution across all financial modules.

Client Engagement: SOW Bernal

Nov 2024 – Apr 2025

- Independently built a **Proof-of-Concept (POC)** for the SOW Bernal engagement, which was used to **secure client approval** and greenlight the project as a **fully billable engagement**.
- Delivered comprehensive features including workflow management, project handling, manufacturing, shipping, and individual sales screens, along with master data management for customers, users, roles, permissions, and work order-related configurations, as well as multi-parameter search functionality for supporting daily operations for enterprise users.
- Engineered reusable ReactJS components and optimized backend services, **driving a 40% improvement in API response times** across the application.
- Designed and implemented **Spring Security with JWT authentication**, role-based authorization, and protected routes with granular permission controls for different user roles.
- Automated error-log archival with a Spring Batch weekly job that compresses logs into ZIP files, **eliminating roughly 5 hours/week of manual review and cleanup**.

Java Developer Intern — LetsGrowMore

project-link: github.com/PavanDurgam16/LGM_Projects

Jun 2023 – Jul 2023

- Developed a Dynamic Currency Converter web application enabling real-time conversion between currencies using an exchange rate API.
- Built a Tic-Tac-Toe game in Java, implementing game logic for player interactions and outcome detection.
- Received a **Letter of Recommendation** for exceptional performance and contributions during the internship.

- Developed “Coastal Adventure — Explore the Serene Beaches of India,” a **responsive landing page** featuring dynamic moving slides and animations across devices.
- Built a responsive Instagram Clone covering the main feed, profile page, and stories listing.
- Created an interactive To-Do List web application enabling users to add, organize, and complete tasks.

TECHNICAL SKILLS

Programming Languages: Java (8+), JavaScript (ES6+), SQL, PL/SQL, HTML5, CSS3

Backend Development: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Spring Batch, Hibernate, Servlets, RESTful Web Services

Frontend Development: Angular 15, ReactJS, Redux Toolkit, React-Bootstrap, R-Suite, Responsive UI Design

Microservices & Architecture: Spring Cloud, Netflix Eureka, Feign Client, API Gateway, Resilience4j, Distributed Systems

Databases: Oracle Database, MySQL, PostgreSQL, SQL, PL/SQL

Cloud Platforms: AWS (EC2, S3, IAM)

Messaging Systems: Apache Kafka (fundamentals)

DevOps & CI/CD: Docker, Git, GitHub, SVN, Maven, Apache Tomcat, Liquibase

Testing & Dev Tools: Postman, IntelliJ IDEA, VS Code, JUnit, Mockito

Practices: Agile/Scrum, SDLC, Code Reviews, Unit Testing

PERSONAL PROJECTS

Project: E-Commerce [project-link: github.com/PavanDurgam16/ecommerce](https://github.com/PavanDurgam16/ecommerce)

- Built a full-stack e-commerce platform with **JWT-based authentication and role-based access control** for Admin and Customer users.
- Designed a normalized relational database for products, orders, users, and inventory, and documented all **REST APIs with Swagger/OpenAPI**.
- Implemented comprehensive product catalog management with CRUD operations, category filtering, and inventory tracking and built dynamic cart/order processing with real-time price calculations.
- Integrated **AWS S3** for scalable product image storage with secure upload, retrieval, and deletion capabilities, enabling efficient management of product images across the platform.
- Developed responsive Angular UI with lazy-loaded modules for product browsing, checkout flow, and order tracking and integrated role-based navigation and protected routes for admin dashboards.

Technologies: Java, Spring Boot, Spring Security (JWT), Spring Data JPA, MySQL, Swagger/OpenAPI, Angular, Maven, Git/GitHub

Project: Student Management System. [project-link: github.com/PavanDurgam16/student-ms](https://github.com/PavanDurgam16/student-ms)

- Built a full-stack application with **Spring Boot REST APIs and Angular UI** for managing students, courses, teachers, and enrollments with complete CRUD operations.
- Designed relational database schema with **JPA/Hibernate ORM**, implementing entity mappings (One-to-Many, Many-to-One, Many-to-Many) between Students, Courses, Teachers, and Enrollment entities.
- Developed responsive Angular UI with reactive forms, client-side validation, dynamic tables, and search/filter functionality for efficient data management.
- Optimized data retrieval using Hibernate with proper fetch strategies, JPQL queries, and pagination for handling large datasets.

Technologies: Java, Spring Boot, JPA, MySQL, Angular, Maven, Lombok, IntelliJ, Git/GitHub

KEY ACHIEVEMENTS

- Recognized with “**Team of the Quarter**” Award at Satyam Venture Engineering Services for consistent delivery impact, technical excellence, and cross-functional collaboration.
- Independently built a **Proof-of-Concept (POC)** for the SOW Bernal engagement, which secured client approval and greenlit the project as a fully billable engagement.
- Optimized API performance achieving **24% to 40% response time reduction** through SQL/PL-SQL to JPA/Hibernate migration and query tuning.
- Automated error-log archival using Spring Batch, **eliminating 5+ hours/week of manual review and cleanup effort**.
- Achieved a **3-star rating on HackerRank** in Java programming

CERTIFICATIONS

- AI Immersion Week Certification — CII

EDUCATION

B. Tech, Chemical Engineering — CGPA: 7.58/10

May 2022

University College of Technology, Osmania University, Hyderabad
